### **Interview Summary**

Applicants thank the Examiner for the courtesy of an interview conducted on April 22, 2009.

During the interview, the Examiner acknowledged to Frederick Wilkins and Applicants' representative, Elias Domingo, that the reference cited in the Office Action mailed December 29, 2008 cannot preclude patentability under 35 U.S.C. § 103(c), but further clarified that the corresponding publication, U.S. Patent Application Publication No. U.S. 2002/0189951 A1, would be available in lieu thereof in the rejection based on

35 U.S.C. § 103(a) noted in the Action. Applicants clarified that the claims as amended would nonetheless distinguish over the teaching of the reference.

The Examiner explained that independent claim 15 as presented in the Response dated March 17, 2009, would be allowable, and further suggested that independent claims 31 and 32 be similarly amended to be placed in allowable condition. Applicants agreed to submit a Supplemental Response accordingly, but reserved the right to pursue patentable subject matter as presented in the claims as originally filed.

Accordingly, pending claims 15, 34, 36-39, 42, and 44-48 are allowable.

#### New Claims

Claims 47 and 48 are newly presented. Independent claim 47 is presented in accordance with the Examiner's suggestion as explained above. Dependent claim 48 depends from independent claim 47 and recites additional features of the invention. These new claims are patentable for at least the reasons noted herein as well as those presented in the Response dated March 17, 2009.
